

THE FOUR ESSENTIAL GUN CLEANING STEPS

To achieve maximum results, we recommend the following 4 steps. If you are accustomed to using a C.L.P. (Clean, Lube and Protect product), we recommend using Shooter's Choice FP-10 Lubricant Elite®.

STEP 1
CLEAN BORE

CLEAN YOUR BORE OR BARREL

Most rifles and pistols have, what is called, a rifled bore. It is essential to clean and remove fouling build-up from the bore with a bore cleaner using a quality phosphor bronze brush.

TIP #1:

If cleaning a shotgun, the powder and plastic wad residue build-up, which is not visible to the naked eye, must be removed from the inside of the barrel and choke tubes.

Our original **MC#7 Bore Cleaner** and **MC#7 Extra Strength Bore Cleaner** both work very well. We do, however, highly recommend using our **Shotgun & Choke Tube Cleaner** because of its unique and powerful formula. It is more effective at melting the plastic wad fouling and much easier and faster to use due to its convenient aerosol package.

Our **MC#7 Bore Cleaner**, **MC#7 Extra Strength Bore Cleaner** and **Shotgun & Choke Tube Cleaner** are very effective at cleaning Inline Muzzleloaders and removing the plastic and carbon residue from sabot ammunition.

TIP #2:

For stubborn jobs, such as heavy copper build-up, use our **Copper Remover** after first using the **MC#7 Bore Cleaner**, **MC#7 Extra Strength Bore Cleaner** or **Aqua Clean Bore Cleaner**.

For heavy lead build-up, we recommend using our **Lead Remover** solvent.

Suggested STEP ONE Products:

- MC#7 Bore Cleaner and Conditioner
- MC#7 Extra Strength Aerosol Bore Cleaner
- Aqua Clean Bore Cleaner
- Shotgun and Choke Tube Cleaner
- Copper Remover
- Lead Remover

STEP 2
CLEAN ACTION

CLEAN YOUR ACTION

After cleaning the bore, the action needs to be cleaned/degreased. Apply a small amount of bore cleaner of your choice. Using a nylon bristle utility brush, gently scrub the parts to loosen residue from all areas of the action, receiver and trigger assembly.

Spray the action cleaner/degreaser on the action to flush away solvent, fouling, old lubricant and residue. **(Always relubricate after cleaning/degreasing.)**

TIP #1:

Although all of our degreasers perform the same job, you'll want to use our **Polymer Safe Quick Scrub** or our **Aqua Clean Degreaser** for firearms that have synthetic/polymer stocks, frames, receivers, parts, etc.

TIP #2:

Our **Quick Scrub III** is very effective but if not used as directed could be harmful to painted surfaces, plastics, polymers and wood surfaces.

TIP #3:

For a non-hazardous, non-flammable, odorless, environmentally friendly alternative, use our **Aqua Clean Firearms Action Cleaner/Degreaser**.

Suggested STEP TWO Products to Clean and Degrease:

- Polymer Safe Quick Scrub
- Quick Scrub III
- Aqua Clean Firearms Action Cleaner/Degreaser

STEP 3
LUBE

LUBRICATE ALL MOVING PARTS

After cleaning/degreasing the action, lubricating the moving parts of the firearm is necessary. **FP-10 Lubricant Elite®** is best for closer tolerances and most general lubrication needs. It can also be used as a highly effective C.L.P.

For areas that have wider tolerances or need lubrication to adhere under heavy demands and/or extreme heat, our **All Weather High-Tech Grease** is highly recommended.

Both lubricants can be used on different parts of the action within the same firearm.

Suggested STEP THREE Products:

- FP-10 Lubricant Elite®
- Synthetic All Weather High-Tech Gun Grease

STEP 4
PROTECT

PROTECT YOUR FIREARMS

To help protect firearms from rust and corrosion, use **Rust Prevent** on all metallic surfaces including inside the bore or barrel. This superior anti-oxidant, moisture displacing agent is engineered to preserve all gun metals and will ensure a greater chance of keeping the firearm from rust, pitting and corrosion. In addition, it will effectively neutralize the acids from airborne salts, fingerprints and perspiration contact.

Although **FP-10 Lubricant** will help protect moving parts, **Rust Prevent** is the recommended product to safeguard all the metal on your firearms.

Shooter's Choice **Rust Prevent** can and should be applied over our **FP-10 Lubricant Elite®**.

Suggested STEP FOUR Products:

- Rust Prevent Corrosion Inhibitor

Shooter's Choice has been providing high quality solvents and lubricants for the Firearms Industry for almost 30 years. Each is uniquely formulated and constantly tested to achieve very specific results. Regardless of the gun you shoot, your firearm will need to be properly cleaned and lubricated. Trust Shooter's Choice to have the finest products to accommodate your needs. Plus, all our solvents and lubricants are proudly manufactured and packaged in the U.S.A.
